PAN NO. AAWCS0796E
DATED-27/11/2025

Vendor details: Smartcircuits Innovation Pvt. Ltd. was founded in 2015 in Yamunanagar, Haryana. The Co-Founders recognized that true learning transcends textbooks and theoretical frameworks. As a response to this insight, each STEM (Science, Technology, Engineering, and Mathematics) product developed by Smartcircuits Innovation is designed to engage children in practical applications, fostering a deeper understanding of the underlying concepts through hands-on activities.

Moreover, Smartcircuits Innovation distinguishes itself by having tie-ups with ISRO, IUEF, International Asteroid Search Collaboration - NASA Citizen Scientist Project and International Astronautical Federation.

They also offer courses and labs that embrace a blended learning approach, incorporating a play-based curriculum. The company employs a hybrid education model that seamlessly integrates real and virtual teaching aids. This approach facilitates classroom experiential learning, providing educational institutions with the tools and technology necessary to deliver modern and effective learning experiences.
